

Call for expression of interest FLEXGRID

August 2016 - Smart grids

The Provence-Alpes-Côte d'Azur region and two clusters named « Capenergies » and « Secured Communicating Solutions » launched the 1st call for expression of interest under the Flexgrid program for the industrialisation of Smart Grids in July 2016.

Any stakeholders in the Smart Grids industry (companies, training or research centres, etc.) may apply to take part in the Flexgrid program. The call for interest aims at:

- Positioning the French supply for technologies and services on the Flexgrid projects portfolio and promoting them to main contractors, solutions integrators and, on a broader level, on the most promising Smart Grids markets.
- Enabling new projects to join the program.

Flexgrid is a program for the industrialisation of Smart Grids, which was selected as part of the national call for projects for the large-scale deployment of smart grids launched last year by the French Government. Flexgrid proposes the deployment of technological solutions across a pioneering region in the Smart Grids sector, to respond to the challenges of the energy transition.

Deadline for applications: October 31, 2016 (midnight Central European Time)

Guidelines and online candidature forms are available on the dedicated website:
